Lloyd Electric & Engineering awarded major India Locomotive HVAC Contract

GE Transportation has signed a US \$18m contract with Lloyd Electric & Engineering Limited to supply custom designed air-conditioning units for the Indian Railways Marhowra Locomotive project.

The contract is to design, manufacture, test and supply air-conditioning units to be manufactured in Lloyd's factory in Bhiwadi, Rajasthan over a period of 11 years. Design of the equipment will be a collaborative effort within the Lloyd group of companies and led by Lloyd's recently acquired subsidiary Noske-Kaeser Rail & Vehicle New Zealand, based in Palmerston North, New Zealand.

This project is a significant win for Lloyd Electric & Engineering and builds on existing business between GE Transportation and Noske-Kaeser Rail & Vehicle New Zealand.

The air-conditioning units to be manufactured by Lloyd are to provide driver comfort for 1000 diesel locomotives to be manufactured in a new plant being built by GE Transportation in Marhowa, Bihar. This project advances the 'Make in India' initiative and reinforces India's position as a global manufacturing destination.

About Lloyd Electric & Engineering

Lloyd Electric and Engineering Limited is a publicly traded company with its headquarters in New Delhi. It is a leading supplier of air-conditioning equipment with a special focus on rail applications at its Bhiwadi factory. In addition, Lloyd has multiple manufacturing facilities throughout India and subsidiaries Noske-Kaeser Rail & Vehicle New Zealand in Palmerston North, Noske-Kaeser Rail & Vehicle Germany in Hamburg and Janka Engineering in Prague.
